HYDROGEN DEVELOPMENT

Douna Machinery wants to take the next step in green hydrogen technology. Douna Machinery is a participant in the WAviatER project. In the project, a Northern Dutch consortium will develop green hydrogen technology. Douna Machinery will also work with Entrance to design a demo electrolyser with a graphic display. Douna Machinery has also joined the World Business Maintenance Group to provide maintenance for future hydrogen plants.

DOUNA MACHINERY SERVICE

Our service technicians are at your service. With the fully equipped service van and BE truck, we can be on location quickly. Thus, for any job, whether large or small, we can bring all parts for you right away. What you can expect from our VCA-full qualified service technicians:

- Repair / (preventive) Maintenance
- Overhaul & parts processing
- Disassembly and assembly of machine (parts)
- Welding of steel, stainless steel and aluminum
- Scan for further development of your machinery

Any questions? Feel free to contact us!

NEW WAREHOUSE

The new energy economical warehouse hall is almost finished. This hall (550 m2) is connected to the current hall with a lock. For current and new customers, Douna has the possibility to stock spare parts. This offers us even more opportunities to provide you with the service you need.

Please inquire about the possibilities!
